

AEC - interior design

NTA.1P

The interior design specialist

The interior designer produces functional interior layouts in new and existing buildings, in the private and public sectors alike, while taking technical, economic, ecological and social aspects into account.

- Length of program: **16 months**
- **24 hours of coursework (self-paced learning, virtual evening classes)** and individual work per week

The **825-hour** ilasallecampus Interior Design - Residential profile program is accredited by the *ministère de l'Éducation, du Loisir et du Sport*.

General objectives

This program will teach you the skills required to design residential interior spaces based on your client's needs. From finding solutions to drawing sketches and plans to offering advice on the choice of colours, materials and furniture, you will be able to execute interior design projects in compliance with plans and estimates.

In the course of your training, you will learn to...

- design functional, aesthetic residential and commercial spaces that respect clients' needs, standards and constraints.
- draw technical plans based on a concept (using the drafting table or computer).
- choose the right materials.
- present your project to a client.

By the end of your training as an interior designer, you will be qualified to develop creative solutions to problems regarding interior spaces, thereby improving your clients' quality of life and work.

Required materials & software

- Basic drawing tools and accessories
- AutoCAD, Adobe Photoshop, Adobe Illustrator, and Microsoft Office PowerPoint

Minimum recommended equipment

- Microcomputer with 1.6MHz Pentium IV+ or Mac Intel *
- Windows 2000, XP, Vista, Windows 7 or Mac OS 10.2+ *
